

Master Gardeners

The Master Gardens (MG) provide a resource to answer garden related issues. The MG's research a wide variety of resources and contacts for researching questions. They also share information and can see regional trends that may affect our gardens. Should they be unable to provide the answer to the question the MG will take the members contact information and provide the information to the members. No question goes unanswered. We ask members to bring samples along (in a sealed plastic bag) that may be related to the question.
